

## 19mm HD PP Strapping Setup

- ❖ 400kg Break
- ❖ "OH&S Safe"
- ❖ Easy to use
- ❖ Low cost setup

We recommend 19mm HD PP strap for general purpose use on pallets weighing up to 800kg,\* light packs of timber and light bailing. This is a setup for use with a tensioner, sealer and seals. However PP strapping can be also used with just a tensioner and wire buckle.

	Code	Description	Image
